Low & High-Fidelity Prototypes (Shopping Cart)

The initial low-fidelity prototype had an overview of the items on the left and the receipt on the right. Since the initial designs, a "continue shopping" button was added on the right side to enable user control and freedom after the heuristic evaluation was performed. The design would let users edit or delete the item directly from the cart page.

[Home](#)[Menu](#)[About](#)

Your Cart

Original

Glaze: Sugar-milk
Buns per box: 3

Qty: 1

\$9.00

[Edit](#) [Delete](#)

Walnut

Glaze: Double-chocolate
Buns per box: 1

Qty: 2

\$10.00

[Edit](#) [Delete](#)

Order Summary

Original (3pc) x 1 **\$9.00**

Walnut (1pc) x 2 **\$10.00**

Total (pre-tax) **\$19.00**

Tax **\$2.28**

Total \$21.28

112 Sprint Street Pittsburgh, PA

• (555) 555-5555

The high-fidelity prototype made the cost per item much clearer using bold, blue text. Additionally, the total cost on the right was highlighted in this way. This version enables users to change the quantity of each item directly on the cart page rather than just statically showing the amount like in the low-fidelity prototype. Lastly, to streamline terminology, the high fidelity prototype changed the language from “Your Bun Box” to “Your Cart” to be consistent across pages and not to be confused with “buns per box” language.
